ADDITIONAL INFO

- Other tools: X++, D365 F&O Electronic Reporting, Unity, MS Office
- Strong communication & technical support problem-solving
- Video/photo editing, basic 2D/3D editing
- Driving Licence: Category B
- Drone Licence: A1/A2/A3

GEORGIOS GEORGIOU

FULL-STACK .NET DEVELOPER

PROFILE

Full-stack software developer with over a decade of experience delivering business-critical applications across fintech, banking, ERP, aviation, and public-sector environments. Strong background in C#, ASP.NET Core, .NET MVC, SQL Server, Entity Framework, Blazor, integrations, reporting, and production support. Also builds and ships personal software end to end, including a Unity game published on Google Play. Combines hands-on engineering with customer-facing problem-solving and experience working on complex, high-impact systems.

PROFESSIONAL EXPERIENCE

NATECH 2024 - 2026

Senior Software Engineer / Full-Stack .NET Developer

- Develop and support fintech and banking software across API, client, and service layers within microservices-oriented enterprise systems.
- Build backend services and web features using ASP.NET Core, Blazor WebAssembly, SQL Server, Entity Framework, ADO.NET, RabbitMQ, MassTransit, and async programming patterns.
- Maintain and enhance a large banking platform in WinForms, supporting critical business workflows in enterprise banking environments.
- Work on customer data, onboarding, remediation, reporting, and document retrieval and download workflows in Azure-connected enterprise environments.
- Write and troubleshoot stored procedures, JSON and data-processing logic, and maintainable data-access flows for enterprise applications.
- Contribute to automated testing practices, including unit tests with xUnit and NUnit.

EPSILON NET 2023 - 2024

D365 Finance & Operations Developer

- Contributed to the successful go-live for a major client in Greece with multiple customizations in Microsoft Dynamics 365 Finance & Operations.
- Specialized in Electronic Reporting design, implementation, and support.

ITEAM 2021 - 2023

Mid-Senior Software Developer

- Worked on large aviation projects across design, implementation, and support phases.
- Developed solutions with .NET, VB.NET, ASP.NET MVC/Core, and Angular.
- Participated in 24/7 customer support for a major airline client.

GNOSIS COMPUTERS 2015 - 2021

Full-Stack .NET Developer & Customer Support Specialist

- Developed municipal and public-sector platforms using .NET MVC, .NET Core, Entity Framework/EF Core, LINQ, SQL Server, HTML, CSS, JavaScript, and jQuery.
- Contributed to request/protocol management, hospital appointments, public construction, warehouse, fleet, chemical laboratory, and school administration solutions.
- Implemented features including organization charts/trees, Diavgeia upload automation, analytics/reporting exports, map integration, alerting, and Greek amount-to-text conversion.
- Provided staff-management support across 5 municipalities with 700+ employees and payroll support across 4 municipalities with 400+ employees.

FREELANCE 2014 - 2015

Full-Stack PHP Developer

- Built a fleet-management system for municipalities and a web-service integration with GSIS.

PERSONAL PROJECTS

NumberSequence — Android Puzzle Game Published on Google Play

Solo Developer — Unity, C#

- Designed, developed, and released a 2D puzzle game built in Unity with C#, covering gameplay logic, scoring system, UI, and game-state management.
- Owned the full release cycle solo: Android build configuration and signing, store listing and assets, policy compliance, and publishing to the Google Play Store.
- Live listing: play.google.com/store/apps/details?id=com.george.numbersequence

RevXBot — Revolut X Trading Bot Ongoing project

Solo Developer — ASP.NET Core, EF Core, SQLite

- Automated spot-trading bot for the Revolut X exchange with secure Ed25519-signed API integration.
- Backtester on real 1-minute candles; live orders protected by three independent safety gates.
